MOMENTUM KIDS' FULL BODY HARNESS

For climbing and mountaineering only. Climbing and mountaineering are dangerous. Understand and accept the risks involved before participating. Minors and others not able to fully understand the risks involved must be supervised by an experienced and responsible person. You are responsible for your own actions and decisions. Before using this product, read and understand all instructions and warnings that accompany it. If you are uncertain about how to use this product, read and understand its limitations. Seek qualified instruction. Contact Black Diamond if you are uncertain about how to use this product. Do not modify this product in any way. Failure to read and follow these warnings can result in severe injury or death!

A WARNING [EN]

For climbing and mountaineering only. Climbing and mountaineering are dangerous. Understand and accept the risks involved before participating. Minors and others not able to fully understand the risks involved must be supervised by an experienced and responsible person. You are responsible for your own actions and decisions. Before using this product, read and understand all instructions and warnings that accompany it. If you are uncertain about how to use this product, read and understand its limitations. Seek qualified instruction. Contact Black Diamond if you are uncertain about how to use this product. Do not modify this product in any way. Failure to read and follow these warnings can result in severe injury or death!

KEY:

- Risk of serious injury or death
- Risk of accident or injury
- Instructions for use
- Keep instructions for future reference.

This product explains specific use and some common measures for the climbing equipment and its use. Other possible misuses exist. Correct equipment use and the use of redundant systems will reduce some of the risks associated with climbing. If you lack experience, use this equipment under proper supervision. Always consider how a rescue might be best carried out in case you or others are in need of help.

This Type B Full Body harness is intended to provide protection against falls while climbing or mountaineering for children weighing up to 40 kg.

Fig. 1: Twing in (Se accompanying illustrations)

If you have any questions, whether your harness fits correctly, consult with a qualified instructor.

A We do not recommend that children learn climb, belay or rappel.

A It is the adult's responsibility to provide for, adjust and frequently check the child's harness to make sure the fit is right to it.

A If the harness is not being used, store it properly buckled and that the climbing rope is correctly tied to the harness.

CARE AND MAINTENANCE

Climbing gear must not come into contact with corrosive materials such as battery acid, battery fumes, solvents, chlorine bleach, antifreeze, isopropyl alcohol or gasoline. After contact with saltwater or salt air, always rinse and dry textile products.

(See accompanying illustrations)

LIFESPAN, INSPECTION AND RETIREMENT

Climbing gear does not last forever. Inspect your gear before and after each use, and return it when it fails or inspection if it reaches its maximum lifespan: 10 years after manufacture, even if unused and properly stored.

See the accompanying illustrations. Return your gear immediately if any of the illustrated conditions are found:

- Additional factors that may reduce the useful life of climbing gear:
- Exposure to heat, sunlight, solvents, fatty, battery acid or battery fumes
- Damage and extreme conditions may shorten your equipment's useful life, and could require retiring the gear during its first use

Inspect your gear immediately if you suspect damage during use or if you have any doubts about the condition of your gear, or after a serious fall, fall arrest or other damage.

Retired gear should be destroyed to prevent future use.

In the event of your harness failing to be disinfected, we recommend that you leave it with us for repair.

Refer to Markings Section of these instructions in order to determine the date of manufacture of this equipment.

STORAGE AND TRANSPORT

(See accompanying illustrations)

Other components that meet EN 8225, and those that meet EN-12275, and those that meet EN-12275-A1:2018, and those that meet CE/ISO 20412 certified mountaineering equipment that is compatible with this product.
